### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record do not fairly teach in permissible combination the claimed invention. In addition to the reasons previously set forth, claim 1 is also allowable in view of WO 99/17057 and Pillsbury et al (5,359,847) as neither of these patents teach the claimed structure of claim 1 and 5. Note that neither of these references teach at least these limitations: "a burner insert disposed in an annular space between the burner assembly and the basket, the insert having a face exposed to the combustion chamber and perpendicular to the axis of the basket," "a plurality of passageways formed through the basket, for introducing air into the combustion chamber proximate to and downstream of the burner insert" and in claim 5, the combustor casing must be concentric with the cylindrical basket. The rest of the independent claims have been too extensively modified during prosecution for the art cited by the EPO to be applicable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
